

Sportsground Assessment

STRI Group is the world's leading consultancy for design, research and management of natural and synthetic sports turf surfaces. In June 2015 **SportsTurf Consultants** became part of the **STRI Group**.

Combining our local expertise and exceptional service levels with the global reach of **STRI Group** allows us to provide unrivalled levels of support, innovation and practical solutions to match our clients' needs, budget and resources. We service all of the country and our skills and knowledge cover all sporting codes.

- Sportsfields can become excessively boggy in winter due to poor soil type & inadequate drainage
- Soft (& hard) grounds & poor surface conditions may lead to an increased risk of injuries
- We have conducted over 5,000 playing condition audits for councils & schools over the last few years

To manage your risk, can you afford NOT to have your sportsfields independently assessed?

SportsTurf Consultants (Aust.) Pty Ltd

info@sportsturf.com.au www.sportsturf.com.au

SportsTurf Consultants offer a scientifically grounded independent agronomy service to the Australian sports turf industry and provide a broad range of services to Municipal Councils and Schools including;

Comprehensive Sportsfield Audit

- Assessment of the current condition including turf composition, cover, density, health/vigour, wear, weeds, soil conditions etc
- Identify major deficiencies of the playing surface with respect to turf composition, soil type, surface levels, drainage, irrigation etc.
- Short term / maintenance recommendations to provide immediate improvement of problem areas or provide favourable conditions for turf growth
- Long term recommendations for capital improvements with indicative costs
- Development of a sportsfield priority list for undertaking the recommended long-term works

Playing Condition Audit

- Measurement of surface hardness using the Clegg Impact Hammer
- Visual assessment of the surface condition including grass cover, surface evenness, stability, presence of cracks & holes, damage etc.
- Highlight grounds that have high injury potential and require remedial action

Sportsfield Usage Review

- Comparison of actual usage levels to potential usage capacity to highlight over and underused sportsfields
- Provide strategies to manage usage

Agronomic Consultancy

- Turf maintenance programs and advice
- On-site inspection and problem solving
- Site investigation
